A Training Algorithms

```
Algorithm 1 Unsupervised text style transfer.

Input: Data set of two different styles X, Y.

Parameters: weight \lambda and \gamma, temperature \tau.
```

Initialized model parameters $\theta_{\mathbf{E}}, \theta_{\mathbf{G}}, \theta_{\mathrm{LM_x}}, \theta_{\mathrm{LM_y}}$.

repeat

Update θ_{LM_x} and θ_{LM_y} by minimizing $\mathcal{L}_{LM}^{\mathbf{x}}(\theta_{LM_x})$ and $\mathcal{L}_{LM}^{\mathbf{y}}(\theta_{LM_y})$ respectively. Update $\theta_{\mathbf{E}}, \theta_{\mathbf{G}}$ by minimizing: $\mathcal{L}_{rec} - \lambda(\mathcal{L}_{LM}^{\mathbf{x}} + \mathcal{L}_{LM}^{\mathbf{y}})$ using Equation 5.

until convergence

Output: A text style transfer model with parameters $\theta_{\mathbf{E}}$, $\theta_{\mathbf{G}}$.

B Model Configurations

Similar model configuration to that of (Shen et al., 2017) is used for a fair comparison. We use one-layer GRU (Chung et al., 2014) as the encoder and decoder (generator). We set the word embedding size to be 100 and GRU hidden size to be 700. ${\bf v}$ is a vector of size 200. For the language model, we use the same architecture as the decoder. The parameters of the language model are not shared with parameters of other parts and are trained from scratch. We use a batch size of 128, which contains 64 samples from ${\bf X}$ and ${\bf Y}$ respectively. We use Adam (Kingma and Ba, 2014) optimization algorithm to train both the language model and the auto-encoder and the learning rate is set to be the same. Hyper-parameters are selected based on the validation set. We use grid search to pick the best parameters. The learning rate is selected from [1e-3, 5e-4, 2e-4, 1e-4] and λ , the weight of language model loss, is selected from [1.0, 0.5, 0.1]. Models are trained for a total of 20 epochs. We use an annealing strategy to set the temperature of τ of the Gumbel-softmax approximation. The initial value of τ is set to 1.0 and it decays by half every epoch until reaching the minimum value of 0.001.

C Sentiment Transfer Examples

| Original (Shen et al., 2017) (Hu et al., 2017a) LM LM + classifier | it was super dry and had a weird taste to the entire slice. it was super friendly and had a nice touch to the same. it was super well-made and had a weird taste to the entire slice. it was very good, had a good taste to the food service. it was super fresh and had a delicious taste to the entire slice. |
| Livi + Classifier | it was super fresh and had a delicious taste to the entire slice. |
| Original | my goodness it was so gross. |
| (Shen et al., 2017) | my server it was so . |
| (Hu et al., 2017a) | my goodness it was so refreshing. |
| LM + classifier | my food it was so good . my goodness it was so great . |
| Livi + Classifici | my goodness it was so great. |
| Original | maintenance is equally incompetent. |
| (Shen et al., 2017) | everything is terrific professional. |
| (Hu et al., 2017a) | maintenance is equally hilarious. |
| LM | maintenance is very great. |
| LM + classifier | maintenance is equally great. |
| Original | if i could give them a zero star review i would! |
| (Shen et al., 2017) | if i will give them a breakfast star here ever! |
| (Hu et al., 2017a) | if i lite give them a sweetheart star review i would! |
| LM | if i could give them a _num_ star place i would. |
| LM + classifier | if i can give them a great star review i would! |
